

Recipe Tab:

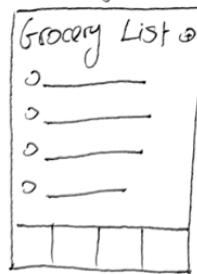

- * Recipe tab starts off by showing your favorite recipes with search bar at the bottom connected to the API.
- * Searching gives you results displayed in "recipe cards". Click a star next to a recipe to add it to your favorites for easy access next time

Recipe Card:

- * Recipe cards allow you to get a sneak peek at a recipe & add it to your favorites.
- * Clicking on one shows an expanded view dependent on what we get from the API

Grocery List

- * We said we would start the list off simple, so we sketched out a simple list. Potential features to add:
 - * grocery store locator
 - * item sorting by aisles

Pantry

- * Can basically exactly copy the grocery list interface. If we figure out sorting there, we could potentially apply it here to sort by category.
